QUANTITY DISCOUNTS

We solicit large orders and as an inducement, we offer the following schedule of discounts instead of making each, 10, and 100 rates as practiced by some Nurserymen:

4%	on total order of $	50.00 or more
6%	on total order of	100.00 or more
8%	on total order of	250.00 or more
10%	on total order of	500.00 or more
15%	on total order of	1,000.00 or more

TAKE NOTICE

This saves you having to buy more than you need of one variety or size in order to get a discount on your purchases. Above $50.00 all you buy from this catalog, regardless of whether you take one of a kind or 5, 50, or 500, the more you buy the more you save.

NEW REDUCED PRICES

This list supersedes and cancels all outstanding wholesale quotations. Prices are subject to change without notice.

Your Customer Pays Freight

TRANSPORTATION: We can deliver to any point in the Gulf Coast territory at l. c. l. freight rates, either by motor freight truck or our own trucks. When we have a truckload of 5,000 or 7,000 lbs. for a certain destination, we can make delivery to your packing house or to **your job.** Write for our truck delivery prices.

All prices are **f. o. b. our** Nurseries and shipments travel at the **risk and expense** of the purchaser. We load trucks and carloads at our Nurseries or Mt. Evergreen, Texas. Express and less carload shipments are made from Beaumont, Texas.

OUR RESPONSIBILITY

GUARANTEE: We will **replace any plants** not true to name or up to grade, but shall be liable only for the purchase price received. All carriers are responsible for **any damage** or injury in transit.

WE INVITE "KICKS"

CLAIMS: Any claims must be made **upon receipt of shipment** or within five days. Complaints properly presented will be given special attention. Be sure to **have exception** for damages noted on **transportation receipt** at time of delivery.

B&B—THE GRIFFING WAY

WHAT IS B&B? Moving a tree with the roots in the soil in which it grew.

OUR BEAUMONT BALLING SOIL. Our great success in transplanting Trees and Shrubs safely at all seasons of the year may be largely attributed to **our wonderful Balling Soil.** There is **no other just like it.** We have the soil that **is just right** for balling and burlapping. The ball **is spaded out** of the ground in **one solid piece,** often compared to slicing a **piece of cheese.**

Our particular soil is known among Oil Company Geologists as **"BEAUMONT LOAM"** peculiar **only to this section.** It is rich and black, and **when taken up** in the form of a Ball, it will not **crack or crumble;** nor does it **dissolve or melt down** when set **in water for weeks.** On the contrary, this is the way to preserve **the life of the Trees.**

WHAT IS NB? A Tree or Shrub **dug with naked roots** (Not Balled), puddled and packed in wet packing material.

STANDARDIZED GRADING

In 1923, the American Association of Nurserymen adopted a **Standardized System for Grading Nursery Stock,** using the **symbol of X's** to indicate **QUALITY** and dividing the various classes of Evergreens into **Grade Groups.** In our judgment, this is the **only** way to **honestly grade and sell** Nursery Stock.

When you visit our Nurseries, we will be glad to show you what is meant by **Standardized Grading,** and when you order, if you will specify the **Quality you want,** we will make your selection accordingly. We give the following illustration to **show what is meant by Grading by X's**—all plants are the **same height,** but there is **a great difference** in the general **appearance and value.**

XXX XX X

Griffing's Waxleaf Ligustrum **illustrating Quality.**

Throughout this list, you will find the schedule of **prices are according to X's.**

XXX indicates strictly heavy, low branched, **choice** Trees or Shrubs.

XX indicates well developed, medium branched, **good** merchantable Trees or Shrubs.

X indicates a fair quality, measured by height, and not **necessarily perfect** Specimens.

SPECIMEN STOCK selected or marked in the Nurseries will be priced **according to its value.**

NOTICE: If you **do not find** the stock you want listed, please write us and **we may be able to supply you.** We have many varieties in insufficient quantities to **warrant listing.** We invite correspondence and are ready to assist our patrons in every way we can.

ALPHABETICAL LISTING

All Trees, Shrubs and Vines listed in this catalog are under their **common names,** according to **"Standardized Plant Names."**

For your convenience in finding what you want, we are listing all Trees and Shrubs **by their common names** in Alphabetical Order. We are **cross indexing the botanical names** and synonyms to assist you in finding **what you may be looking for.**

ELAEAGNUS

This family of popular and hardy Evergreens is one we can safely recommend for Shade locations, **fragrant flowers** and **edible fruit.** The three varieties we prefer to **grow are Dwarfed habit** and **grow low** and compact.

DWARF THORNY — E. pungens nana

Live-Oak-Shaped Leaves, silvery underneath.

CUTTING GROWN

4 – 5 ft.	B&B	2.60	3.25	each

Elaeagnus is one of the newer Broadleaf Evergreens that has gained popularity in the last few years. It provides a contrast in color of foliage, and grows equally well in Sun or Shade.

GRIFFING'S COMPACT — E. pungens compacta

New unusual variety, a sport of Fruitlandi discovered by us in 1934. Preferred to other types of Elaeagnus by **many customers** and Landscape men because of its **close, compact attractive growth.**

ROSEDALE — E. pungens rosedale

A new sport. **Small leaves,** upright grower, many **small branches.** Where used in shade for Hedges with its new **bronze leaves** and brownish bark, makes excellent contrast color in plantings.

OAK, SPANISH LIVE — *Quercus virginiana*

Nursery grown Live Oak Trees **live** and thrive under all conditions when the Trees have been root-pruned and properly Balled from the right kind of balling soil and pruned properly before they are dug.

SPANISH LIVE OAK

We have the **complete stock** from Acorns gathered in Florida from the choicest **isolated grove** in existence, so there is not a chance of **hybridizing.** This true type of **fast-growing** Oaks are destined to revise the idea that Live Oaks **are a slow growing tree,** much different from the ordinary native Live Oak in Louisiana and Texas, which we call the **Scrub Live Oak,** but takes too long to grow.

FAST GROWING EVERGREEN SPANISH LIVE OAK

Always clean, rich green foliage. Very straight bodies. From young seedlings we **trim to single stem** in center, not allowing forks even on our 20 foot trees. In **centuries to come these** forked trees may split open and **ruin the tree.**

HOW TO PLANT

Plant Right AND Trees Will Grow

HOW TO PLANT B&B TREES: Dig a hole a few inches wider than the ball itself. For heavy or poorly drained land, set the ball with its shoulders level or from one to two inches above the level of the land. For light, sandy soil, the ball should be about two inches below the level of the land. If the dirt in the bottom of the hole is dry, fill the hole with water once or twice and let it soak into the ground. Then set the ball in the hole.

Do not use the loose dirt that is taken from the hole as back-fill. Instead, start spading the outer walls of the hole in toward the ball, about one foot deep. Keep spading around until the ground is broken two or three feet from the ball. Then press firmly toward the ball, using the feet or a heavy "tamp."

Next, hill the dirt up around the stem of the plant four to eight inches high and as far out as the ball reaches. Beginning at the outer edge of the spaded area, using the dirt taken from the hole, make a rim from four to six inches high and from eight to twelve inches wide to form a basin, to hold water, so it will soak down under the ball. Leave the basin for months after planting.

TO WATER, push the end of the hose down beside the ball and let water run until the basin is full. This will fill the air spaces. Mulch with about a bushel or more of rough stable manure, leaves or lawn clippings.

HOW TO PLANT NB TREES: All NB (Bare Root) Trees lose a part of their roots in transplanting. To offset the root loss, the branches should be pruned back half way or more as soon as planted. To plant NB Trees, Roses, etc., a change of color can be seen on the trunks where the surface level should be. Fill in fine soil among the roots, placing the roots carefully in the position they should grow. Then follow the same instructions as for planting B&B Trees.
